Authorized as Second Class Mail, Post Office Department, Ottawa

VOLUME 33: No. 8

ACME, ALBERTA, THURSDAY, APRIL 1st, 1954

\$1.50 a Year; 5c a Copy

In honor of Miss Marion Torrance, Reg. N., whose marriage to Mr. W. J. Cameron Kirby, M. L.A. of Red Deer, will take place April 10, a shower party was held recently at Carbon. Hostesses were Mrs. S. N. Wright, Mrs. A. J. McCleod, Mrs. H. R. Gimbel and Mrs. H. Holstein at the former's home. The bride-elect was presented with a corsage of yellow roses, and little Shirley Gimbel and Jerry Wright, dressed as nurse and doctor, wheeled in a miniature operating table on which were gifts for the bride elect from the 60 guests.

Among those attending the Bull Sale in Calgary were Mr. and Mrs. Dick Rowbottom, Toni Rowbottom and Jim Edwards, Bob Reid who two entries. Dick Rowbottom bought one of Al De Boer's entries.

We are glad to report that Mrs Charles King is home and on the way to recovery after her recent serious illness in the Three Hills Municipal Hospital.

Mr. and Mrs. Wiffen received word on Thursday of the death of Mrs. Wiffen's brother at Bentley. They left to attend the funeral on Saturday.

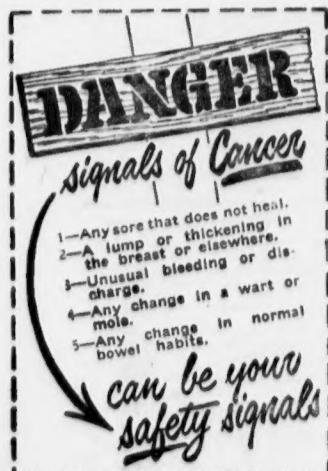

Mr. and Mrs. Otto Martin left on Tuesday to spend a few days at Edmonton with their son-in-law and daughter, Mr. and Mrs. Earl Lambert.

Out-of-town guests at the Shirley Brown shower were Mrs. McKibbin, Mrs. Joe Greenan, Mrs. Fairburn and Miss Noreen, all of Calgary; Miss Jean McDonald and Mrs. W. Milligan of Edmonton.

FOR SALE—Newly built large Wardrobe, Cupboard.
—Apply Mrs. S. J. Garrett.

CANADIAN CANCER SOCIETY
DRUMHELLER, ALBERTA

Mr. and Mrs. McAlpine of Carbon and Mr. J. Stout of Irricana motored to Innisfail on Sunday to visit at the home of their son-in-law and daughter, Mr. and Mrs. Ivan Flint.

A very beautiful shower was held on Saturday, March 27th in the Legion Hall in honor of Miss Shirley Brown whose marriage will take place in Edmonton on Easter Monday. Shirley was born in Carbon and attended the Carbon school, Mr. Brown being the operator of the West Carbon Coal Co. for several years. The hostesses presented the bride-to-be with a corsage.

The evening was spent in musical numbers and a contest, after which the bride-elect was presented with many beautiful gifts. Lunch was later served by the hostesses and the evening closed as usual.

Mr. and Mrs. Sheersmith left on Wednesday to make their future home at Trochu.

A farewell party was held in the Carbon Scout Hall on Monday, March 29th to bid farewell to a young couple who were born and have resided in Carbon ever since, Ruth and Don Gordon and son Barry who are leaving shortly to take up residence in Trochu where they have purchased the Schmierer farm. The evening was spent in musical numbers, contest and community singing. Stewart Hay was M.C. for the evening. On behalf of the community he presented Ruth and Don with two beautiful chairs, and a baby rocker chair for Barry. On behalf of the Sunday School, Gail McCracken presented Don with a tie and best wishes from all. Then a beautiful lunch was served and the evening closed with the singing of Auld Lang Syne and best wishes for their future success in their new home and district.

The Home and School was postponed for a week so the regular monthly meeting will be held on Thursday, April 8th at 8 p.m.

FOR SALE—Massey-Harris 3 ft. Tiller in good shape. Will take cattle or hay as part payment. —Apply Mr. Otto Martin, phone 108 or box 53, Carbon.

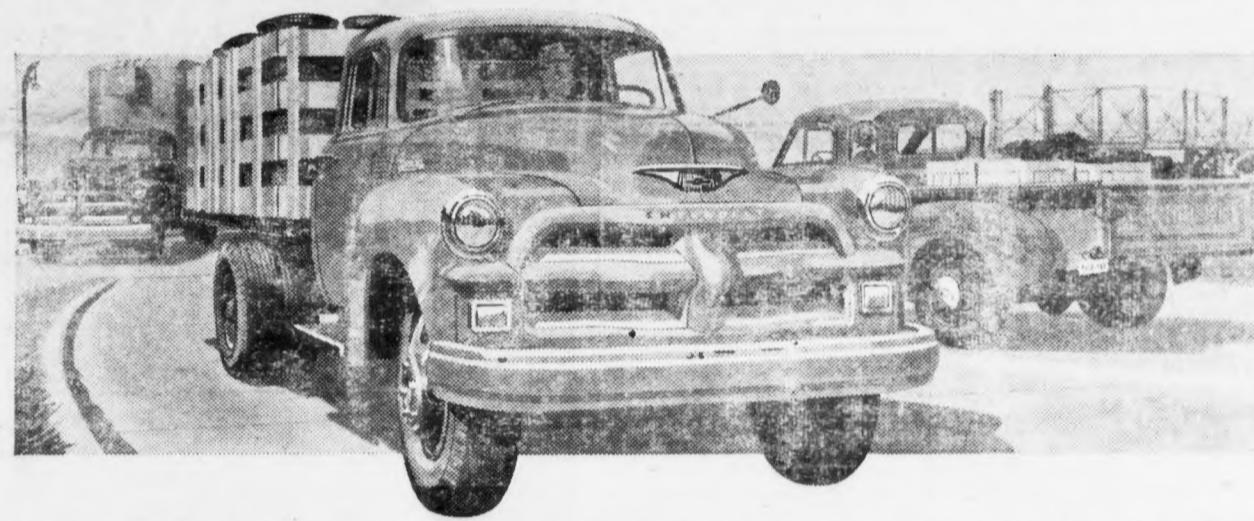

Warning to Parents

CHILDREN WHO ARE PERMITTED TO PLAY ON THE STREETS ARE IN CONSTANT DANGER BY TRUCKS & CARS.

THE CO-OPERATION OF PARENTS TO SAVE THE CHILD WILL BE APPRECIATED.

**Constable,
Village of Carbon**

The truck that's built to last!

CHEVROLET
does more work per day ... more work per dollar!

You Save Hours on the Road. Thanks to new high-compression engine power, you can maintain faster schedules without driving at higher maximum road speeds. Increased acceleration and hill-climbing ability let you save time where it counts. And you do it with greater safety and economy!

You Save Time on Deliveries. With new truck Hydra-Matic transmission, you save valuable time at every delivery stop. And you can forget about clutching and shifting for good! This proved, economical, automatic transmission is optional at extra cost on $\frac{1}{2}$ -, $\frac{3}{4}$ - and 1-ton models.

You Save with Lower Upkeep, too. New Chevrolet trucks are built stronger to last longer and save you money on maintenance. For example, there are heavier axle shafts in two-ton models ... bigger clutches in light- and heavy-duty models ... stronger frames in all models.

And Your Savings Start the Day You Buy. In fact, they start with the low price you pay — and they never stop as long as you own a Chevrolet truck. And Chevrolet is also the truck that has a traditionally higher trade-in value.

Come in and see all the wonderful new things you get in Canada's number one truck. We'll be glad to give you all the money-saving facts.

Cloud Seeding In Virden Area Likely Again This Year

VIRDEN, Man. — Farmers from Virden district were among those from southwest Manitoba who attended the first annual meeting of Weather Modification Limited in Brandon. Cloud seeding in this area will likely be continued this year, the meeting learned.

Among the directors elected at water to cloud seeding, the meeting were C. Gordon and T. Bailey of Oak Lake and D. Watt and C. Campbell of Reston. Virden directors will be added to the board after the annual meeting here has been held.

Last year this area of Manitoba became the site of the first Canadian experiment in ground-to-cloud seeding to increase rainfall. Farmers contributed \$5 per quarter section and through an elected board of directors made arrangements for a rain-increasing program with Water Resources Development Corp. of Denver, Colorado.

Three months of cloud seeding were done with generators being located around the target area. Farmers in the southwest corner of Manitoba paid \$33,000 for the experiment.

Discussions and reports at last Thursday's meeting as reported by the Brandon Sun indicated keen interest in continuing the project.

Lloyd McSorley, representing the American company and manager of its Brandon office, told the meeting in an operational report that the exact results of last year's program could not be determined. He said that 1953 was an abnormal year, with a heavy rainfall, but singled out the southern part of the province as an example of seeding results.

Early predictions had stated 1953 would be a dry year in southern Manitoba, Mr. McSorley said. However, Boissevain had received rainfall two inches above normal, and Plamondon one and one-half inches above normal. Mr. McSorley said that his company attributed 35 per cent. of this excess

Helps You Overcome FALSE TEETH Looseness and Worry

No longer be annoyed or feel ill-aise because of loose, wobbly false teeth. FASTEETH, an improved alkaline (non-acid) powder, sprinkled on your plates holds them firmer so they feel more comfortable. Avoid embarrassment caused by loose plates. Get FASTEETH today at any drug counter.

You can't go ALL-OUT if you feel ALL-IN

These days most people work under pressure, worry more, sleep less. This strain on body and brain makes physical fitness easier to lose—harder to regain. Today's tense living, lowered resistance, overwork, worry—any of these may affect normal kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest, that "fired-out" heavy-headed feeling often follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys to normal action. Then you feel better—sleep better—work better. Ask for Dodd's Kidney Pills at any drug counter.

Mr. McSorley warned against completing a report on only one year's operations, but said that his company had operated for three years in the Dakotas, and government reports for this area had shown an increase of 30 per cent. in moisture received in this area. The firm representative also told of a five-year contract negotiated with the Spanish government, for the seeding of clouds over agricultural areas of that country.

With her well-loaded barrow, the portly woman was making a gallant effort to reach the top of the hill. A man who was passing, seeing her struggle, lent a hand. After sustained effort the top was reached. She was grateful. "Thanks, lad; do you smoke?"

"I do," he said hopefully. "Ay," she replied, "I thought as much, the way you've been puffin' and blowin'!"

"You plead guilty to stealing the overcoat," said the magistrate. "Have you anything to say?"

"Yes, your worship. I had to have the sleeves shortened."

A young husband realized it was time to start saving money. He decided that he would not use the bus any more when returning from his office. He ran behind the bus, arrived home gasping, and said to his wife: "Darling, I saved 10 cents this morning by running behind the bus!"

"You're a fool!" said his wife. "Why didn't you run behind a taxi and save half a dollar?"

Next door's hens were con-

Funny and Otherwise

New Secretary: "Where do we keep the round envelopes?"

Office Manager: "Round envelopes? What do you want them for?"

New Secretary: "The boss said for me to mail out some circulars."

A man who was passing, seeing her struggle, lent a hand. After sustained effort the top was reached.

She was grateful. "Thanks, lad; do you smoke?"

"I do," he said hopefully. "Ay," she replied, "I thought as much, the way you've been puffin' and blowin'!"

"You plead guilty to stealing the overcoat," said the magistrate. "Have you anything to say?"

"Yes, your worship. I had to have the sleeves shortened."

A young husband realized it was time to start saving money. He decided that he would not use the bus any more when returning from his office. He ran behind the bus, arrived home gasping, and said to his wife: "Darling, I saved 10 cents this morning by running behind the bus!"

"You're a fool!" said his wife. "Why didn't you run behind a taxi and save half a dollar?"

Next door's hens were con-

stantly coming through a hole in the wire of the chicken run. The Joneses protested several times, but the hole was never mended. At last Mrs. Jones said firmly: "I've had enough of this!"

The next evening Mr. Jones saw his neighbor patching up the chicken wire with furious haste. He went into the kitchen and said to his wife: "What did you do to him?"

Nothing, dear," she replied with a smile. "I just put four shop eggs under one of our bushes, and made sure he saw me collect them."

The new vicar had preached his first sermon, and a critical member of the church, an exceedingly fat man, waylaid him after the service.

"Not a bad beginning, sir."

he said, patronizingly; "a bit too scientific and modern, perhaps, but quite fair. Remember, parson, you must feed the sheep, feed the sheep."

The vicar surveyed his bulky critic, and replied, "My dear man, it's exercise you need, not food."

A well-known American author met an old man called Uncle Joe, who was always cheerful in spite of having had more than his share of life's troubles.

"How have you managed to retain your calmness and cheerfulness in spite of them all?" asked the author.

"Well, sah, Ah'll tell you," replied Uncle Joe. "Ah'se just learned to co-operate wid the inevitable."

West Berlin Is Once Again A City Of Parks, Trees and Lakes

(CPC Correspondent)

WEST BERLIN, Germany.—Though one doesn't ordinarily think of a city of 2½ million people as a likely place for hunting, fishing, sailing, hiking and picnicking, residents of West Berlin are able to do all that and more within their city limits.

The Berliner is traditionally cosmopolitan, cultured city person, but within each one beats the heart of an outdoorsman. So he has quietly set aside 17 per cent. of the city's area for forests, and more acres are devoted to rivers and lakes, while every borough and suburb is dotted with gardens, tree-bordered streets and parks.

Berlin's most famous park is

dedicated by British Foreign Minister Anthony Eden in 1952 and now one of the favorite parts of the Tiergarten.

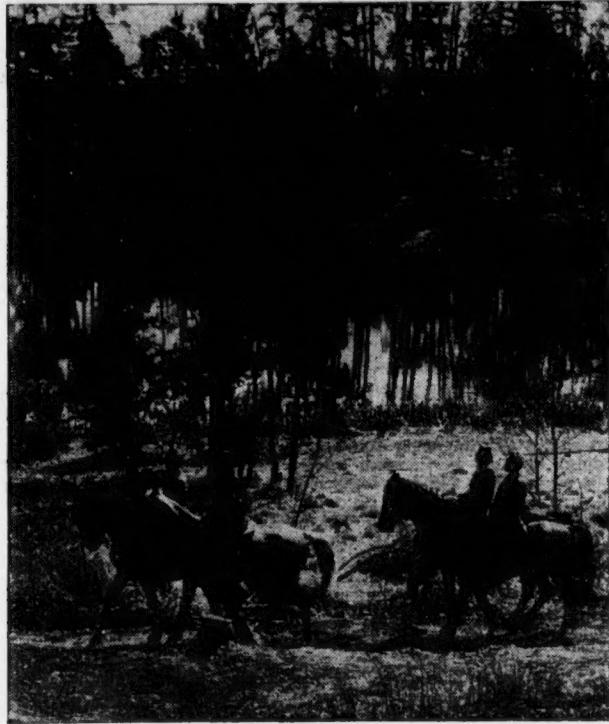

One of Mayor Reuter's last of official duties before his death was the opening of the Park House—a white house roofed with straw and built on the foundations of a villa once belonging to the actor Gustav Grundgens in the English Garden.

The zoological garden and aquarium have been largely rebuilt, the aquarium opening to the public during 1953.

There are more than 1,500 animals in the zoo, among the many famous being Shanti, the little elephant presented to the children

Berliners is the Grunewald, a large forested area bordering the Havel river and containing much wild animal and bird life—enough so that hunting was recently restored there. Wild boars, roe-deer, fallow deer, pheasants, wood-cocks, foxes, hares, rabbits, partridges and many kinds of wild birds may be found.

Berliners have solved another problem—rubble removal—by their great love of the outdoors. They are building large hills (or small mountains, as they like to think of them) of the tons of rubble removed from the heart of the city in reconstruction projects. One of these new mountains will become, perhaps by next winter, a winter sports area complete with ski lift and jump—right within the city limits of West Berlin.

—Central Press Canadian.

A riding party enjoys the tranquil beauty of the Grunewald in Berlin, the Tiergarten, known the world over for its beautiful trees and outstanding zoological and botanical gardens and aquarium.

Almost completely destroyed by one of the last battles of World War II, the Tiergarten ruins were "Berlin's worst war wound," according to the late Mayor Ernest Reuter, who shared his fellow citizens' great love for this beautiful park. Only 700 old trees remained, the zoo was shattered and all its animals gone, and vegetable gardens grew where once rare flowers bloomed.

Today a complete metamorphosis has taken place, and the Tiergarten is again one of the world's most beautiful parks, thanks to a remarkable plan for reforestation undertaken as a living friendship memorial.

The Federal Republic of Germany, two federal states and 39 individual towns in West Germany co-operated in sending young trees and money to Berlin, and several thousand populars, set out in 1950, form a thriving "nursery" shielding a beautiful large grove of young oak and beech trees.

Near a grove of rhododendron, a memorial stone has been erected as an expression of gratitude to the sponsoring towns. In addition, the British people sponsored the building of an English garden,

On The Side By E. V. Durling

So-called "leg falsies" are by no means a new idea. Over 50 years ago young women in the theatrical profession were using them to improve the appearance of their limbs. In those days, these artificial aids to leg beauty were called "symmetricals" and were sold by theatrical costumers. My informant is the veteran vaudevillian, Elizabeth Held.

Andersen Vs. Anderson

When Anderson is spelled with an "o" the person so named is of Swedish birth or descent. When Andersen is spelled with an "e" the person is of Danish birth or descent. Keep that in mind. The Andersons and Andersen are very touchy as to the accurate spelling of their names.

The Self-Assured Sex

It was a woman, that brilliant novelist, Mary Bradden, who made the following apt observation as to her sex: "The eastern potentate, who declared women were at the bottom of all mischief, should have gone a little further and seen why it is so. It is because women are never lazy. They don't know what it is to be quiet. If they can't agitate the universe, they will make mountains of warfare and vexations out of domestic molehills. Forbid them to hold forth upon the freedom of nations and wrongs of mankind and they'll quarrel with one another about the shape of a mantle or the character of a maid servant. To call them the weaker sex, is to utter a hideous mockery. They are the stronger sex, the noisier, the more persevering, the most self-assured sex."

Confusion on Confusion

Am informed that there is a man whose first name is Iris. What a blow to my bitter campaign No. 987654D! What an addition to the world's confusion! Why do parents bestow such names on male children? Iris is definitely a feminine name. It originated in Greek mythology. Iris, the daughter of Thaumas and Electra, was a messenger of the gods. She was an attendant of Juno. As you know, Juno was the goddess of marriage, the protectress of married women.

Why Not Male Nurses?

Female nurses are in attendance in the male wards of hospitals. Why shouldn't male nurses be permitted to act in women's wards? The majority of doctors and surgeons are males. They attend women. Why cannot male nurses do likewise? This is a question advanced by a physician who says that barring male nurses from women's wards is another example of the "inequality of the treatment of the sexes." Says the doctor, "Why should it be assumed, although men who are ill like the soothing touch of a beautiful, young sympathetic nurse, that ladies who are ill would not prefer the soothing touch of a handsome young male nurse?"

Something to Laugh At

Has your wife tossed any unique parties lately? A San Franciscan informs me he spent an evening packed with laughs at a party called "A screwball hat soiree." At this party, both women and men guests came wearing quaint and curious looking hats.

Doctor's Orders

Are you the proud parents of some very young children? How are their appetites? Any trouble making them eat? What do you think of a five-year-old girl who eats five meals a day? She eats four steaks daily, plus four bananas, a pound of rice, fruit salad and other food for extra vitamins. All by doctor's orders. This child, a resident of Cremona, Italy, has an intestinal tract seven feet larger than normal.

Spring-Lamb Pie Makes a Delicious Meal

BY DOROTHY MADDOX

WITH lamb prices down a little, it's a good time for spring-lamb pie. Combined with well-seasoned mashed potatoes, small white onions, green peas and egg yolks, economy shoulder lamb produces a delicious one-dish meal.

Spring-Lamb Pie (4 servings)

Three pounds shoulder lamb, bone in; 2 cups water, ½ cup fat, 1 teaspoon salt, ½ teaspoon pepper, ½ cup flour, 3 cups lamb broth, 1 teaspoon kitchen bouquet, 2 cups cooked green peas, 1 cup cooked small white onions, 2 to 3 cups well-seasoned mashed potatoes, 2 egg yolks, beaten.

Place lamb on rack in Dutch oven. Add water and cook over moderate heat until tender, about 1½ hours. Or cook in pressure saucepan for 20 minutes at 15 pounds pressure. Cool meat slightly in broth.

Remove meat from bones, cutting in 1-inch cubes. Melt fat in saucepan, add salt, pepper and flour. Pour fat from lamb broth. Add water to lamb broth, to make 3 cups. Stir into fat-flour mixture.

Cook over moderate heat, stirring constantly, until gravy thickens. Add kitchen bouquet. Combine lamb, peas and onions in gravy. Place in shallow, greased, 1½-quart baking dish. Whip mashed potatoes and beaten egg yolks together.

Make border of mashed potatoes around edge of baking dish with pastry bag or cookie press. Bake in hot oven (425 degrees F.) until potato is lightly browned and pie is beginning to bubble. Serve immediately with tossed salad of spring greens.

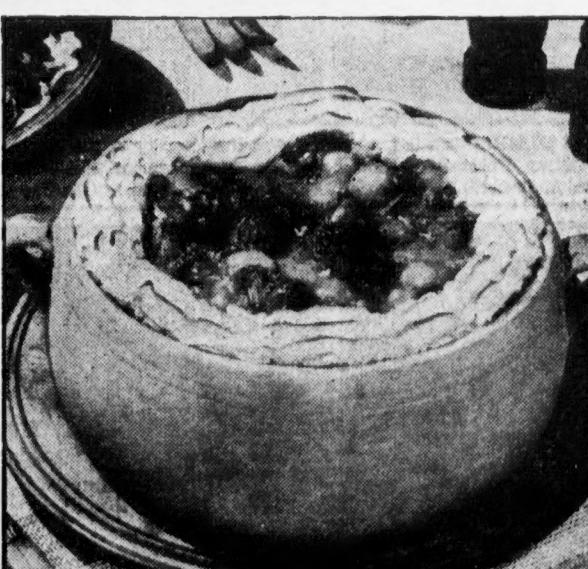

For the bridge or canasta party, this de luxe chicken and mushroom salad is just right. Served with wedges of canned cranberry jelly, it makes a beautiful dish.

Chicken and Mushroom Salad (4 servings)

One cup cooked rice, 2 cups diced cooked chicken, 3-ounce can broiled mushrooms, ½ cup well-seasoned French dressing, ½ cup mayonnaise, ½ teaspoon grated onion, ½ teaspoon curry powder, 1 cup diced celery, 6-ounce can cranberry jelly, chilled.

Place rice and chicken in a suitable container. Drain mushrooms, reserving broth for other use. Reserve four whole mushroom crowns for garnish and quarter the remaining mushrooms.

Add quartered mushrooms to rice and chicken. Add French dressing and toss lightly to coat evenly. Place the four whole

The present low price of lamb makes spring-lamb pie both an economical and delicious meal for your family.

crowns in the container and let all marinate in cold place for at least 2 hours.

When ready to serve, drain off any excess French dressing. Remove the whole crowns. Blend together and add the mayonnaise, onion and curry powder to the rice mixture. Add the celery. Toss lightly together to mix well.

Pile salad on individual salad plates. Cut chilled cranberry jelly in 6 slices and halve each slice. Arrange 3 half slices of jelly around each portion of salad. Top each salad with whole mushroom crown and garnish with crisp, green watercress. Serve immediately with hot biscuits for lunch.

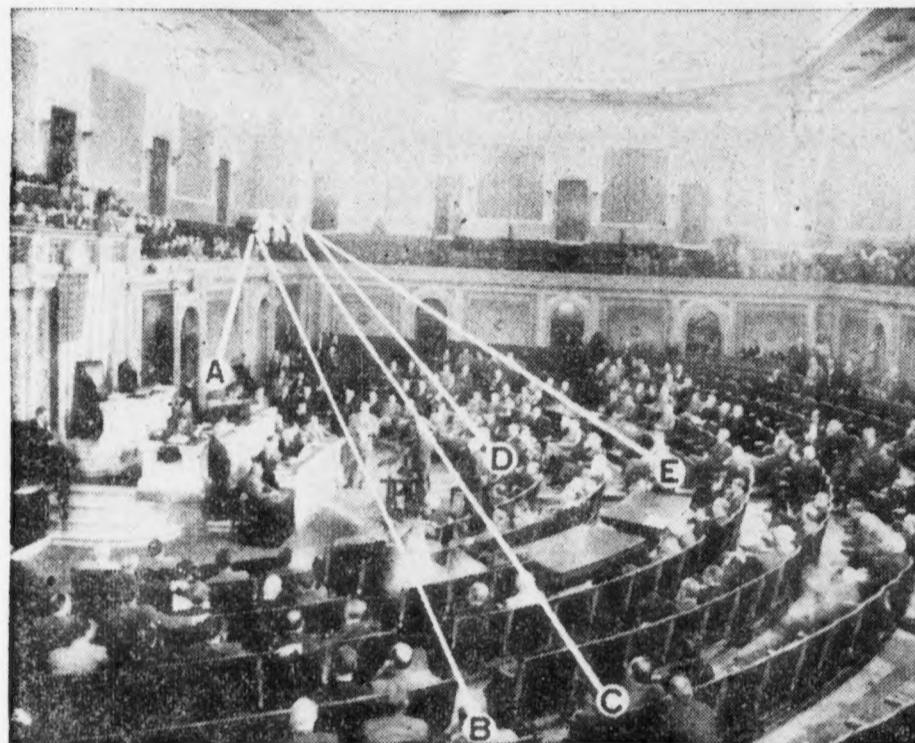

World Happenings In Pictures

Deking The Goalkeeper

Many of the ordinary puck-carrying tricks can be used on the goalkeeper when you carry in close. However, there are several special dekes that are for use on goalkeepers only. The "Cut Across" is such a trick. This deke forces the goalkeeper to move first.

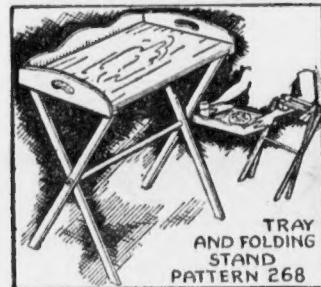

The puck-carrier heads for a spot just outside one of the goal posts, as if he were going to shoot the puck into that side of the goal. This brings the goalkeeper to move again since he must go across with the puck-carrier in case he shoots it quickly into the far side of the net.

As the puck-carrier moves across the goal, he watches the goalkeeper carefully. If he starts across with the puck-carrier quickly, the puck-carrier should shoot low and hard at the side of the goal the goalkeeper has just left. If the goalkeeper is slow in getting across, the puck-carrier shoots at the open net on the side of the goal to which he is heading. Often the goalkeeper will slide across to cover the shot. If he does this, the puck-carrier can either shoot high over him or can let a low shot go under the upper body of the goalkeeper since this part of his body usually takes a while to get to the ice.

Basketball Passing Tip

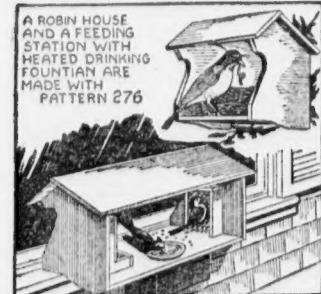

Generally speaking, aim your passes so that they arrive chest high when they reach the receiver.

TRAY AND FOLDING STAND PATTERN 268

These quickly made stand-up tray sets will have many uses in the house and out of doors next summer. They are quite easy to make with the use of a pattern from which the irregular shaped parts are traced directly onto the wood. The stand should be made from clear pine, maple or other close grained wood that is free from defects. The tray would be nice made from the same kind of solid stock but plywood might do for the bottom of the tray. Ordinary upholsterer's webbing, three inches wide is used on the collapsible stand. The pattern covers each step in cutting, assembling and finishing both pieces. Price of the pattern is 35c.

Now that robins are returning from their southern vacations they will be looking for just the right type of house in which to build their nests. The end pieces for the nesting house shown are the same as for the feeding station so I have included on one pattern the necessary tracing diagrams for both. Large perspective drawings show the steps in sawing out all the pieces and assembling the two structures. The feeding station sits on a window ledge and the part of the roof nearest the window is glass so the songsters may be watched from indoors during the winter. Price of pattern 276 is 35c, if ordered separately or it will be included with the Bird House Packet No. 1, at \$1.50 postpaid.

WEEKLY BIBLE COMMENT

UNEMPLOYMENT AND CHRISTIAN TEACHINGS

Saint Paul was very specific on the matter of earning the right to live.

He reminded the Christians that they were members one of another. He said that the strong should serve the weak, and that all Christians should by love serve one another.

But when he saw unworthy individuals taking advantage of the good will of others, using these fine Christian principles of brotherly love to infringe upon the work of others—he was blunt and decisive.

If a man did not work, he said, neither should he eat. In the Christian economy, everyone should help his brother. There was no place for loafers.

That was a sound principle, but what Paul did not foresee was the situation in a modern complex society when, in periods of deep depression, many who ask only for work and self-help, are unable to find it.

What would Paul have had to say about this? We do not know, but we do know that all the problems associated with work, unemployment and living are moral and spiritual problems with which

RIGHT TO BE PROUD

MOOSOMIN, Sask.—Just after Rocanville community had finished raising thirty thousand dollars for a grand new Memorial Hall, fire swept the Rocanville rink, and all but wiped it out. With their usual united effort, the community faced this new problem and now they have opened a twenty-thousand dollar skating and curling rink that would be the envy of any community. The new structure, built by volunteer labor, provides a full size skating ice, and three sheets of curling ice. As for room for spectators, they packed in well over sixteen hundred for that big opening night. Rocanville has every right to be more than proud of the fine new rink.

Christian teachings and principles have much to do.

Those who, for various reasons, find themselves dependent upon relief are not necessarily unworthy, dishonest or indigent. A few are, and they bring unjust criticism to the many who are not.

At the foundation of all welfare, individual and social, is character. The very conditions of life today are character-testing, and the only character that stands the test is the one built upon the ancient Judaic and Christian standards of integrity and regard for others.

These things need emphasis in every community and in our national life.

Camrose Banks To Close Saturdays

CAMROSE, Alta.—All three Chartered Bank branches in Camrose will be closed all day on Saturdays on and after March 20. This new policy is in line with that followed for some months in the larger centres.

In order to assist customers, the banks will re-open Friday afternoons, commencing March 19th, at 4:30 p.m., and remain open until 6:00 p.m.

In Russian medical schools women number as many as one-half of the student body compared to five to 10 per cent. in the United States.

IN ALBERTA

Experimenting With Muskeg Land To Develop Wild Berry And Fruit Industry

Wild fruits and berries may be grown in marketable quantities in the muskegs and sandhill areas of Alberta if experiments being undertaken by the Plant Science Department of the University of Alberta prove successful. A 40-acre tract of beaver-dam bogland near Rocky Mountain House has been obtained from the Department of Lands and Forests and a long-range program will ascertain whether native fruits and berries can be bred and crossed with tame varieties to produce large-fruited hybrids.

While the interest in the first experiments will be with blueberries and cranberries, the varieties listed as worthy of study include Saskatoons, wild strawberries, pin cherries, gooseberries, northern black currants, stemless and wild red raspberries, cloudberries, dewberries and squashberries.

"We have been of the opinion that these wild fruits deserve

Roads Are Keys To Canada's Natural Resources

—Says Gilchrist

Roads are the keys that will unlock the strongbox of Canada's vast natural resources, C. W. Gilchrist, managing director of the Canadian Good Roads Association, told the Mississippi Valley conference of State Highway Departments at the 45th annual meeting in Chicago on March 5.

He pointed out that Canada's oil and mineral wealth is yet virtually untapped, while in some vitally important materials the United States is running low.

"In this frightening age we are entering upon," he said, "where all the scientific achievements of the past will be dwarfed by one little chunk of uranium—and Canada has vast resources of it—we have a great responsibility as a partner of the United States, the manpower and industrial bulwark of the free world. This is to provide adequate roads—roads for mutual defence and roads to open up and develop the great north country where the mineral riches chiefly lie."

The speaker sketched the history of highway development in Canada from the early military and colonization roads down to the "number one" highway project in the country today. There were tremendous difficulties to overcome in building the Trans-Canada Highway, the speaker said, because much of it had to be hewn out of virgin wilderness. It would not be completed for some years, but he found it paradoxical that "a country that can maintain its own atomic reactor and build jet engines does not yet have a transcontinental highway."

Northern Canada, in the view of many experts, could support millions of people if given proper transportation and communications, Mr. Gilchrist said. This northland development was much nearer than most people realized, he believed; the recent establishment of a new federal department of Northern Affairs and Natural Resources was significant.

The provinces of Canada were building roads as fast as money and manpower would permit but were still falling far behind "the insatiable demand," the speaker said. Under such conditions there was not a very coherent and comprehensive policy of developmental roads.

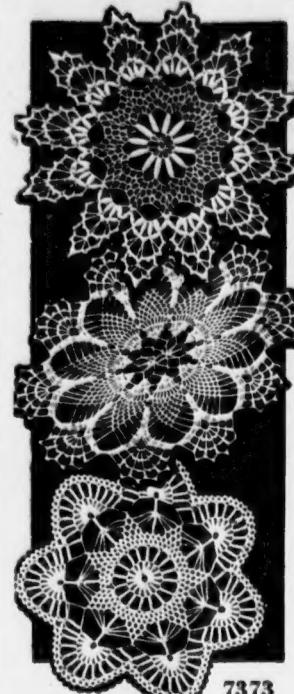

He cited the building of the Mackenzie highway from Alberta into the Northwest Territories as one example of Dominion-Provincial co-operation on a developmental project. The 384-mile road from Grimshaw, at end of steel, in the Peace River district, to Hay river on the south shore of Great Slave lake cost \$4 million, 48 per cent. of which was paid by the federal government, the rest by the province of Alberta.

The road had opened up some of the richest farm country on the continent, developed a vast inland fishing industry and was the outlet for the mineral production of the area.

Mr. Gilchrist declared that many people in Canada did not fully realize the importance of roads in defence, although the military leaders had on many occasions warned that the highways of the nation were woefully inadequate for the movement of military forces.

Patterns Crochet One A Day!

7373

by Alice Brooks

Capture the beauty of a snowflake in jiffy-crochet! They're variations on a star design—show up so dramatically on a table.

Crochet Pattern 7373. Oval doily, 8x10 inches; round doilies, 8½ and 10 inches across in No. 50 cotton.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Department P.P.L.
Household Arts Department,
60 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern number!

TEN COMPLETE PATTERNS to sew, embroider, crochet—printed right in the Alice Brooks Needlcraft Book! Plus many more patterns to send for—including gift ideas, bazaar money-makers, toys, fashions! Send 25 cents now!

Quick Canadin Quiz

- How many Canadians receive monthly cheques from the federal government: 214,000, 976,000 or 3,300,000?
- Why did France retain possession of the islands of St. Pierre and Miquelon when she surrendered North America to Britain?
- Since World War II what has been Canada's highest total of unemployment?
- In hidden taxes will Ottawa collect this year \$300 million, \$700 million, more than a billion and a half?
- What is Canada's population per square mile of area?

:- APPETIZING RECIPES :-

Straight from your oven to your table—a basketful of hot Bran Muffins to serve with plenty of butter and homemade jam.

BRAN ORANGE MUFFINS

Two tbsps. shortening, 1/4 cup sugar, 1 egg, 1 cup ready-to-eat bran cereal, 1/2 cup milk, 1 cup flour, 1/2 tsp. salt, 2 1/2 tsp. baking powder, 2 tbsps. grated orange rind.

Cream shortening and sugar thoroughly; add egg and beat well. Stir in bran and milk; let soak until most of moisture is taken up. Sift flour with salt and baking

powder; add orange rind; add to first mixture and stir only until flour disappears. Fill greased muffin pans two-thirds full and bake in moderately hot oven (400 degrees F.) about 30 minutes.

Yields 12 muffins (2 1/4 inches in diameter) or 8 large muffins (3 inches in diameter). Note: When sour milk or buttermilk is used instead of sweet milk, reduce baking powder to 1 tsp. and add 1/2 tsp. soda.

Garden Notes

For Amateur Gardeners

First Plantings

Even in the cooler parts of the country the first actual plantings are usually carried out in March or earlier. This is the seeding of those things that are usually started in green houses, hotbeds and window sills. Tomatoes, cabbages, petunias, asters, and so on are in this group. Many people don't bother with this first seeding at all, but simply buy the started plants in April or May and set out. Of the first seeds planted directly outside will be the very hardy group of flowers and vegetables, which a bit of frost will not hurt. In this group are sweet peas, cosmos, the first carrots and beets, lettuce, spinach, radish and grass seed.

Then there is the semi-hardy group, which includes most flowers and the harder vegetables. A touch of frost will not ruin them, though they would prefer to do without.

In the last group are the really tender things that won't stand a single degree below 32. In this category are dahlias, canna, gladioli, tomatoes, peppers, melons, cucumbers and so on.

Make It Last

In far too many cases the Canadian gardener thinks just of a few months in the summer and even less when it comes to vegetables. It's a feast or a famine. A few weeks when the lettuce, spinach and radishes are just right. A few days of feasting on green peas or fresh corn, a little longer for tomatoes perhaps, and cucumbers and melons.

That's pretty wasteful gardening.

With the great variety available today, it is possible to spread even relatively short season things like corn, peas and spinach over many weeks. This spreading can be further extended by planting each variety and type at least three times, first earlier than usual, then about the average time

Kitchen Meditations

WHEN TRAMPS WERE BOLD

In days of old when tramps were bold
They walked each beaten trail;
They left a sign—some mark or line
Which was not known to fail.

Only the wise had knowing eyes;
Knew each sign had truthful worth.
Those who could read paus'd to take head

"Of a dog beware!"—twas written there.
"Move on—don't hesitate!"

Not wise to stay; get far away!"
Warned the signs upon the gate.

"This woman kind; free lunch you'll find;
A shake down in the left.

This worth a try—keep a sharp eye;
And this one really soft!"

In days of old when tramps were bold—

They're now most out of date—
They knew the score—maybe lots more!

Before they ventured forth,
By the signs upon the gate.

Some 83 million tons of cargo went through the Suez canal in 1952.

Ticklers

"Must you always shout 'Here comes the chuck wagon' when mom brings in the food?"

OUR COMPLETE SHORT STORY

Top Hat and Overalls

By Rae Resnick

DOCTOR GIFFORD was close to ninety, and he admitted, "I'm beginning to feel old age creeping up on me." But he still had his dream about two great kids he had brought into the world, then seen orphaned in a fire. As the orphanage doctor, he had adopted them unofficially, watched them grow up, go to school, fall in love. Fall in love. But would he live to see them married?

"Darned if I'm going to sit here and feel sorry for myself," he thought. "I'll show 'em Doc Gifford's as spry as ever."

It was close to Easter and he would get them to spend their holidays with him even if he had to whine about an old man's last request.

After he finished the letters to Joyce and Paul, he returned to the armchair and the two youngsters. They had known poverty. That was why Paul wanted to make sure of a secure future.

PATENTS

AN OFFER TO EVERY INVENTOR. List of inventions and full information sent free. THE RAMSAY COMPANY, Registered Patent Attorneys, 273 Bank Street, Ottawa, Canada.

STOP SMOKING WITH THE HELP OF TOBACCO ELIMINATOR
A scientific remedy designed to expel tobacco toxins from the system. Sold under money-back guarantee to rapidly and permanently relieve craving for cigarettes. For free booklet, write:

14½-24½

by Anne Adams

Shorter? Fuller figure? Search no further for hard-to-get lingerie—here's a pattern proportioned for YOU! Designed to fit smoothly, comfortably through the bosom, waist, hips. Sew-easy slip has built-up top or narrow straps.

Pattern 4682: Half sizes 14½, 16½, 18½, 20½, 22½, 24½. Size 16½ slip, 3½ yards 39-inch; panties, 1 yard. Embroidery transfer.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly. Size, Name, Address and Style Number and send orders to:

Department P.P.L.
Anne Adams Pattern Dept.
60 Front Street W., Toronto.

Joyce had agreed that he should study law. She could wait. But after he was gone, she found her days empty. So she had found a job—modelling. Paul had become a brilliant lawyer and Joyce a successful model. Had they changed because of that?

There were two trains that day. Joyce was arriving on the first one—Paul on the second. He waited nervously.

"Oh, D-Doc," Joyce sobbed, "I'm so glad to see you. I should've come a long time ago, but Chicago's so far away."

Still lovable and unspoiled. Paul must be to blame. He cleared his throat noisily. "Stop blubbering over my new suit, child. Cook wants to know what you want for dinner."

"I still like the same things."

"The same man, too?"

"You're the best, Doc."

"I mean, do you still love Paul?"

"I love the boy who went away, but he's a big shot now. We have nothing in common any more."

Love's a good thing to have in common, Doc thought. "He's coming today. He'll be in time for dinner." Her eyes avoided his.

Success glared from Paul's clothes, his manner, the way he walked.

"Joyce is here, too."

"Oh?"

When they came into the living room, Joyce stood in the stairway, as though in a deliberate pose, her hair fashioned in an upswung, sculpturesque hair-do. She looked cold, hard, sophisticated. Trying to impress Paul, Doc thought angrily.

During dinner, he was heartbroken. He could hardly stand those two youngsters—the way they were each secretly in awe of the other's success, and the way they tried to act up to their reputations. If they'd only let their hair down. But Doc wasn't sure about Paul.

After dinner, Joyce went to her room to fix her face. Paul stared at the floor. "Doc, have you changed, too, or can we still have one of our talks?"

An ecstatic pain squeezed his heart. This was more like old times. "What is it, Paul?"

"What can a man do if he's worked like a fireman in hades, driven himself to reach a goal, only to find that there is no such goal?"

"Meaning?"

"I slaved for years so that Joyce would have something after we got married. Now that I can give her those things, she isn't there any more—the old Joyce, I mean. Even if I didn't care that she'd changed, she couldn't possibly want me now. She's sophisticated, worldly, and I'm just—well, you know."

Gifford stood up and went to Joyce's door. "Joyce. Go and do the dishes. Cook's tired. Tell her to give you one of her house-dresses."

She came out. Tears stood in her eyes. "Oh, no, Doc," she pleaded. "Not tonight. A fine mess I'd look."

"Do as I say," he insisted.

Then he went back to the living room. "Paul, go into my room and find a pair of overalls. You're going to help Joyce with the dishes."

"Doc, have a heart. It's not that I mind doing dishes. But how would I look to Joyce, wearing a pair of undersized—"

"Do as I say," he ordered. Dirty dishes, working clothes and sophistication go together like a top hat and overalls, he thought. Let them try and act the sophisticates, dressed like that and washing a stack of dirty dishes.

An hour later, he peeked into the kitchen. The dishes were still stacked in the sink. Joyce and Paul were busy with other things.

He went to the telephone and dialed. "Hello, Judge. This is Doctor Gifford. Get hold of a marriage license and come over here tomorrow. There's going to be a wedding."

HONORED GUEST

PRINCE RUPPERT, B.C. — A young swan which may be one of the rare trumpeter species has set up housekeeping in a pond here. The bird, believed to have stopped here for a rest owing to an injured leg, is being treated like visiting royalty by residents.

CANADIAN CHAMPIONS—Skip Matt Baldwin and his Edmonton curlers won honors for the province of Alberta by winning the Canadian curling championship in winning nine out of ten games. It was Alberta's fifth title in 25 years the bonspiel has been held. The above picture shows David M. Stewart of Macdonald Tobacco Company presenting the Briar Tankard to the winning Edmonton rink. Left to right: David M. Stewart; Matt Baldwin, skip; Glen Gray, third; Pete Ferry, second, and Jim Collins, lead.

Wanham, Alta., Becoming A Thriving And Enterprising Town

Friendly, progressive-minded Wanham, spread over twelve acres a stone's throw from Highway No. 49, has come a long way since Pete Tansem opened the first post office back in 1917. The thriving Central Peace centre, with its stores, entertainment centres, and educational facilities, is the shopping centre for hundreds of families living in an area roughly nine miles wide and 22 miles long.

Wanham's is a story of steady growth rather than a spectacular overnight mushrooming.

E. D. Prevost, a Wanham businessman, remembers that back in 1916 when his family arrived in the district, they purchased a railway ticket for Mile 332 on Grizzly Bear Prairie. Wanham didn't exist.

He recalls that among the early farmers were Alfred Syr, William Trumper, George Gilmour, Sr., Jack Gray, Oscar Oakleaf, Jack Bramlett, Eli Barrett and the Bankhead and Leriger families.

It was in the fall of 1917 that Mr. Tansem opened the post office and first store. The new centre was named Wanham after a railway engineer.

First house built on what is now the town site was built by the Leriger family in 1914. It still stands.

Three distinct tides of settlement washed over the farmlands radiating out from Wanham. In 1920 and 1921, many homesteads were taken up in the district; another big group of settlers took up land in 1928 and 1929.

Most of the land in the Peoria district, south of Wanham was taken up in 1923.

North of Wanham, the Lassiter project opened up 22,000 acres of land in the Wanham trading area following the last war. Wanham, incidentally, was headquarters for the crews engaged in the gigantic land-clearing project.

It was in 1929, oldtimers recall that Wanham's main street really began to take shape. In that year, the hotel, the lumber warehouse, and a couple of stores were built.

Over the years since, new stores, garages and other business prem-

Early Vaccination Of Horses Urged

SASKATOON.—Prairie farmers have been reminded of early vaccination of horses against encephalomyelitis, a type of sleeping sickness widespread in western Canada last year.

Dr. J. S. Fulton, head of the University of Saskatchewan's virus laboratory, said that vaccination programs should be completed in April or early May. Incidence of the disease among humans increased last summer as farmers left their orders for vaccine until mid-summer or later.

The word "hippopotamus" means river horse.

When Skin Itch Drives You MAD

Here is a clean stainless penetrating antiseptic—known all over Canada as MOONE'S EMERALD OIL—that dries right in and brings swift sure relief from the almost unbearable itching and distress.

Its action is so powerfully penetrating that the itching is promptly eased, and with continued use your troubles may soon be over.

Use Emerald Oil night and morning as directions advise for one full week. It is safe to use and failure is rare indeed.

MOONE'S EMERALD OIL can be obtained in the original bottle at any modern drug store—sold satisfaction assured or money back.

Rust-Resistant Flax Available

SASKATOON.—Release of a new, high-yielding, rust-immune selection of Victory flax, has been announced by Dr. J. B. Harrington, head of the Field Husbandry Department of the University of Saskatchewan. This selection, known as Victory, Sask. 5260, excels the parent stock in three important respects—yield, rust resistance and uniformity of height and maturity.

There is now available for distribution to those interested in growing flax a total of 750 bushels of certified seed of Victory, Sask. 5260. A top limit of 20 bushels per individual has been set. The seed will be sold by the University Field Husbandry Department, Saskatoon, at six dollars a bushel sacked and sealed in two bushel lots f.o.b. the cleaning and inspection point at Nipawin.

An annular eclipse of the sun is one in which the moon appears to be slightly smaller than the sun.

Bake this tasty CHEESEBREAD

easily, speedily with new Fast DRY Yeast!

• New bread and bun treats are a treat to make with the new form of Fleischmann's Yeast!

Never a worry about yeast cakes that stale and lose strength... new Fleischmann's Dry Yeast keeps full strength and fast-acting right in your cupboard. Get a month's supply.

CHEESEBREAD

• Scald 3 c. milk, 3/4 c. granulated sugar, 1 1/2 tbs. salt and 4 tbs. shortening; cool to lukewarm. Meanwhile, measure into a large bowl 1 1/2 c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 mins. THEN stir well.

Stir in cooled milk mixture. Stir in 4 c. once-sifted bread flour; beat with a rotary beater until the batter is smooth. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Work in 2 c. lightly-packed finely-shredded old cheese and 5 c. (about) once-sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and let rise until doubled in bulk. Punch down dough; turn out on lightly-floured board and divide into 4 equal portions. Cover lightly with a cloth and let rest for 15 mins. Divide each portion of dough into 3 parts; knead and shape into smooth balls. Place 3 balls in each of 4 greased loaf pans (4 1/2" x 8 1/2"). Grease tops and sprinkle each loaf with 3/4 c. shredded cheese. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, 45-50 mins.

THE ALBERTA LEGISLATURE

The Alberta legislature session goes into the final stretch this week following the approval last week of the record \$205,000,000 budget for the fiscal year which began Thursday. The remainder of the session will be devoted to discussion of legislation and private members' bills and motions.

The total estimated expenditures of \$156,000,000 and statutory payments of \$48,000,000.00 have been studied item-by-item. The budget for the 1953-54 fiscal year ending this week included total estimated expenditures of \$138,000,000 plus \$36,125,000 net statutory payments.

Following the study of the appropriations, the house devoted most of its time to detailed discussion of legislation and bills. On Friday the legislature went

THE WHEAT STEM SAWFLY - A THREAT IN 1954

The damage in Western Canada from the wheat stem sawfly was more widespread and severe in 1953 than it had been for several years. Mr. N. D. Holmes, Entomologist, Science Service Laboratories, Lethbridge, warns that infestations of this pest are likely to present a real threat to wheat production in 1954. This warning is timely, particularly for farmers in the southern areas of Saskatchewan and Alberta.

Resistant Varieties. Unfortunately, there has been a marked decrease in recent years in the acreage sown to sawfly-resistant wheat varieties. Our own wheat variety surveys show that the percentage of the total wheat acreage of Saskatchewan and Alberta devoted to the sawfly-resistant variety Reson decreased from 8.9% in 1951 to 6.5% in 1953. Let it be clearly understood. Growing a resistant crop or a resistant variety is still the most practical and effective way of preventing excessive losses from sawflies. In areas where sawflies are a problem, and where sawfly-resistant wheat varieties are suitable, the planting of Reson or Chimo is very strongly recommended for 1954. In areas such as the Regina Plains, where sawfly-resistant varieties are not acceptable, farmers are urged to take every other known prevent on this crop to minimize possible sawfly losses. Above all, avoid planting wheat on sawfly-infested stubble land.

Plant Best Varieties. Each year crop specialists in each of the Prairie Provinces establish a list of new and other crop varieties adapted to the various soil zones within their respective provinces. The recommended variety lists for 1954 are now available. Free copies can be obtained from your local Agricultural Research Station, nearest University or Experimental Station, or from Line Elevators Farm Service, Winnipeg, Manitoba, only cleaned treated seed of a recommended variety in 1954.

through 43 government bills.

The biggest item was a bill to enact the Municipal Districts Act of 1954. The major policy change is a provision that municipal district councillors will be paid \$10 instead of \$8 a day for attending meetings. During discussion of the municipal districts act, Liberal leader J. Harper Prowse suggested the use of numbers in marking ballots in municipal district elections instead of the present method of marking an "X". Municipal Affairs minister C. E. Gerhart replied that he would suggest this at the next annual meeting of the municipal districts association. Prowse also advocated the use of the proportional representation and single transferable vote systems by rural electors. He said this would help train voters so there would not be so many spoiled ballots in provincial general elections.

Earlier in the week, legislation which doubles penalties for drunken and impaired driving was given first reading. The bill amending the Vehicles and Highway Traffic Act also increases penalties for driving without a license. One change would double to 12 months the automatic suspension of a driver's license on conviction of driving or "having care of a motor vehicle while intoxicated". Thus, Alberta, which already has in force some of the stiffest penalties on the continent, plans to make it even tougher on the motorist who breaks its traffic laws.

Another important bill given first reading last week gives authority for Alberta oil companies to join forces for streamlined methods of conservation and production. An amendment to the Mines and Minerals Act, the bill provides for "unitization" of production. Conservation and production would be based on a unit, afield or a portion of a field, depending on the geographic conditions, instead of one well. The legislation also would allow the government to join in voluntary unit programs with the lessors of crown land.

Only by costly research can the cancer riddle be solved. Last year the Canadian Cancer Society supported, partly or wholly, 75 research projects on cancer.

Early diagnosis and adequate treatment are the only effective means of cancer control.

Cancer is not contagious. It can appear at any age, but usually in older people.

Most of the support for cancer research and welfare work in Canada comes from the voluntary contributions of Canadian citizens through the Canadian Cancer Society.

Since 1935 there has been reported a two-fold increase in cancer of the lung. Cancer research workers are striving to find out why.

Cancer of the skin is the commonest form of cancer in men. It can be detected early and often completely cured.
